| 3. | To have feedbacks from Health Cluster/WHO related to the U5 death cases in Sittwe camps |
| 4. | To finalize WASH drinking water treatment guidelines. |
| 5. | Plan for Rakhine SoF Workshop |
| 6. | Rakhine WASH Cluster 2019 Plan and Training Calendar |
| 7. | AoB |

Minutes:

| Topic 1: To have commitment from all WASH partners to put the WASH facilities safety as priority. | |
|---|---|
| Summary of discussion | <ul style="list-style-type: none"> • Presented the priorities and suggested action plan for the WASH partners - Safety and security of WASH facilities - Improve the safety of WASH facilities - Improve latrine pit covers - Decommissioning of non-functional latrines |

| | |
|---|---|
| | <ul style="list-style-type: none"> - Estimate the number of functional latrines - numbers of new latrine needed? • To establish a working group for the discussion of village level sanitation approach (harmonized approach of latrine design) <ul style="list-style-type: none"> Government recommend for the non-subsidy approach for the village approach. • SI – WASH facilities in ANY are fine, but some pits in NC 1&2 are needed to be decommissioned. |
| Action Plan | <ul style="list-style-type: none"> • WASH cluster to follow up on the issue of safety and security of WASH facilities. |
| Topic 2: Update from the Health Cluster/ WHO related to the U5 death cases in Sittwe camps | |
| Summary of discussion | <ul style="list-style-type: none"> • Presentation by WHO <ul style="list-style-type: none"> - WHO presented the numbers of mild diarrhea cases in each township in the period between mid-Dec 2018 and mid-Jan 2019. - Only 1 severe case of diarrhea was reported and others are mild cases. - Presented the AWD cases from all EWARS sites in 2017, 2018 and 2019. - AWD cases are generally increased in DEC and Jan every year and the highest in mid Jan, 2018 - Only the “Proportionate morbidity” is calculated which is # of AWD cases/ # of total consultation. So, this data does not reflect for the whole population. - Because of the seasonal cause, the diarrhea cases normally increase within these weeks every year. - No death case was reported within this period <p><u>Response of AWD cases</u></p> <ul style="list-style-type: none"> - WHO has received the information of child death on diarrhea case on 20 Jan from WASH Cluster and informed to SHD on 17 Jan (summarization of Epi week 2) - SHD sent one investigation team to TKP sub-center from disease control team on 18 Jan 2019 - Took rectal stool from 4 cases and did the Rapid Diagnosis Test (RDT) |

| | |
|--|--|
| | <ul style="list-style-type: none"> - No cholera case was detected and only found of Rota virus (+) - Dar Pai, STMG, KDK 1 – proportionate morbidity case of diarrhea increased - If any agency wants to report of diarrhoea case to Health Cluster, requested to share the below information for further investigation. <ul style="list-style-type: none"> • Name • Age • Sex • Suspected disease case or suspected a cause of death • Address • Contact information of the reporting person - Standardized health messages – pages 81 & 82 for the WASH related messages |
| Action Plan | <ul style="list-style-type: none"> • WASH partners to continue monitoring of diarrhea cases in their respective camps and to report to WASH Cluster or Health Cluster if there is any case. |
| Topic 3: To finalize the drinking water treatment guideline. | |
| Summary of discussion | <ul style="list-style-type: none"> • WASH cluster has sent the first draft to the cluster mailing list and many feedbacks were received. • The feedbacks were incorporated into the document and it will be shared again to the cluster for further comments/ feedbacks. |
| Action Plan | <ul style="list-style-type: none"> • WASH partners to review the drinking water treatment guidelines paper and provided comments/ feedbacks for the finalization of document. |
| Topic 4: Plan for Rakhine SOF workshop | |
| Summary of discussion | <ul style="list-style-type: none"> • SOF workshop will be conducted on 15th Feb 2019 at the Sittwe Hotel. All the partners are requested to participate. |
| Action Plan | <ul style="list-style-type: none"> • WASH partners to send the nomination of staff to the WASH Cluster. |
| Topic 5: Rakhine WASH Cluster 2019 plan and training calendar | |
| Summary of Discussion | <ul style="list-style-type: none"> • WASH Cluster has shared the Rakhine WASH Cluster 2019 plan. Partners are requested to review it and give feedbacks/ comments. |

| | |
|-----------------------|---|
| | <ul style="list-style-type: none"> • If the agencies have any cluster-wide training or workshop, to be shared with WASH cluster and these will be incorporated to the WASH Cluster 2019 plan. |
| Action Plan | <ul style="list-style-type: none"> • WASH partners to review the WASH Cluster 2019 plan and give feedbacks/ comments. • Partners to share the cluster-wide training or workshop if they have plan. |
| Topic 6: AOB | |
| Summary of Discussion | <ul style="list-style-type: none"> • When WASH cluster checked the population data for the 2019 4W data set-up, CCCM population data is higher than the WASH population data. • WASH partners are requested to check the population data for 2019 and to be shared with WASH cluster if they have been updated. • RI – WASH, CCCM and protection team together conducted the population assessment in Taung Paw camp and now is in analysis stage. |
| Action Plan | <ul style="list-style-type: none"> • Partners to review the population data for 2019 and to share the updated population data if they have been collected. |
