

Experience Sharing / Approaches to Virtual Training – UNHCR

MIMU IM Network Meeting
2 December 2020

UNHCR IM Virtual Workshops

1. Data visualisation and design principles
2. Building interactive dashboards using Power Bi
3. Mobile data collection using Kobo Toolbox
4. Principles of data protection and responsible data management
5. Data analysis tools and techniques

General Points on transition to virtual

- COVID-19, work-from-home
- Staff in the Field are more accessible
- MS Teams

Planning and preparations

- Registration form
- Language
- Package the training - always state objectives
- Good planning is required
- Structure
- Share resources before workshop

Platforms and possible issues

- MS Teams
- Connectivity

Delivering the training

- Interactive and dynamic
- Q&A, Kahoot
- Chat box
- Multiple facilitators

Assessing competency

- Practical exercise in 3 break-out rooms
- 1-hour exercise shared before workshop
- Voluntary presentation of output

Evaluation and learning

- MS Teams private channel for workshop participants as a platform to share recourses and request support
- Feedback form
- Resources list for continued learning

Risks and concerns

- Engagement throughout workshop
