

Mainstreaming gender into data analysis and SDG monitoring

Myanmar Development Observatory

July 2023

MDO at a glance

Gender is one of the cross-cutting issues in designing the MDO.

Gender mainstreaming in terms of:

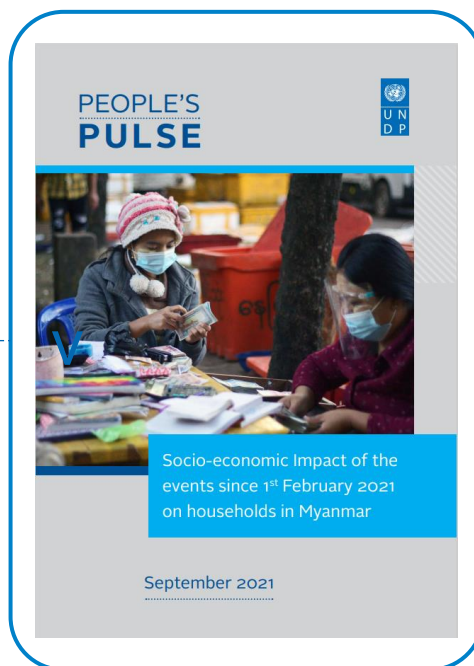

- Gender disaggregated data
- Women specific data
- Women focused study

Gender disaggregated data

Gender disaggregated data

- male vs. female individuals
- male vs. female-headed households

Female were more likely to say access to health services had got worse (63.2 percent compared to 57.8 percent of males).

- It is expected that the female headed households are going to be more likely to be living below the national poverty line.

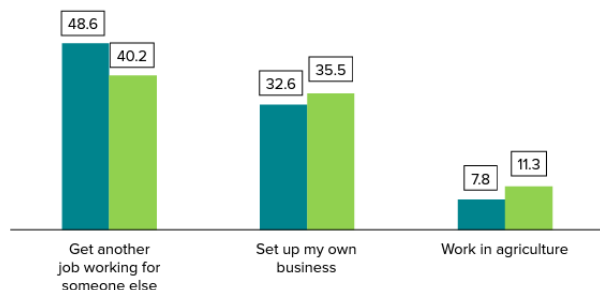

Gender disaggregated data

Gender disaggregated data

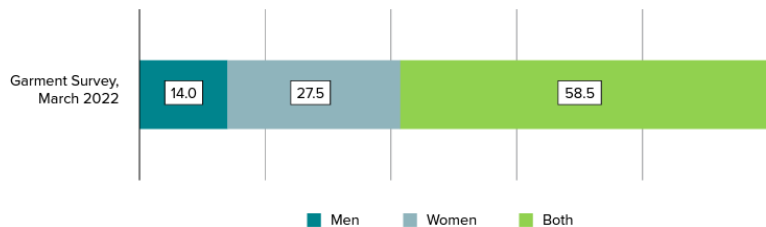

- male vs. female individuals
- male vs. female-headed households

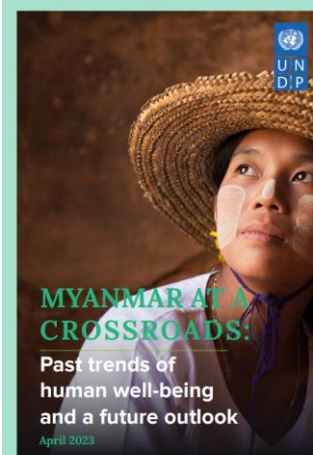

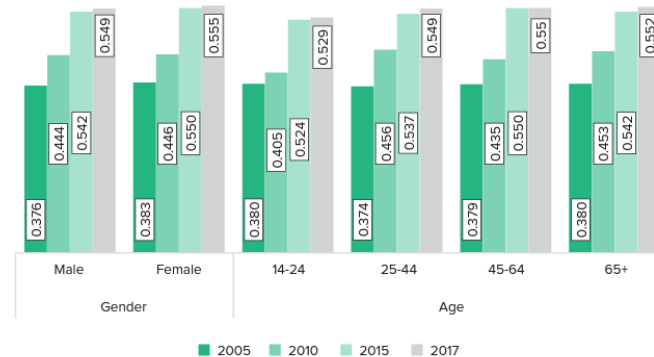

What would you do if you lost your job in the garment sector? (percentage)

4.16. Persons who ate less due to a lack of food or other resources (percentage)

H-HDI by gender and age of the household head (2005–2017)

Differences in H-HDI between female and male headed households by state/region (2017)

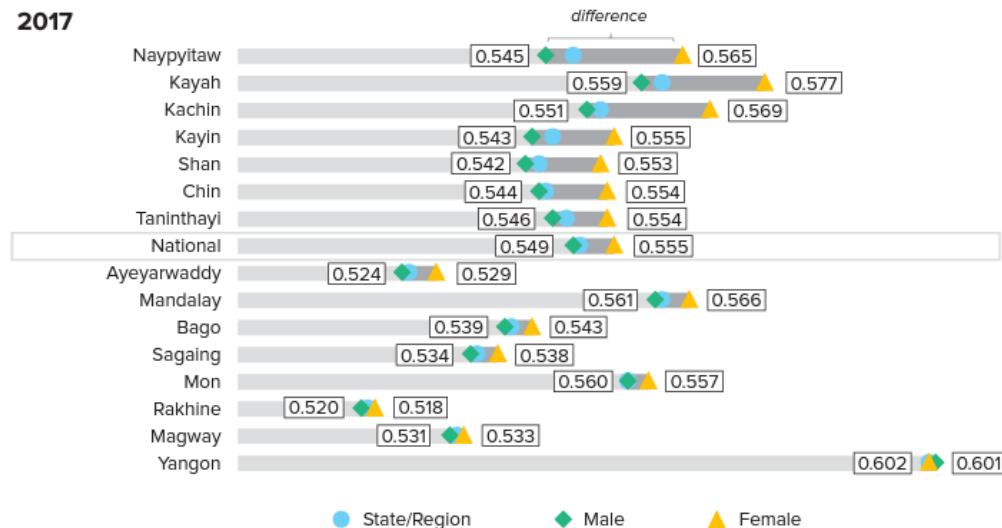

Table 19: Measures of gender based violence by location (percent)

- People Perceptions: A Survey of the Myanmar People
- Thailand Migration Survey

Gender

Gender

Survey	Percentage
Household Vulnerability Survey, October 2020	33.0
People's Pulse, May/June 2021	63.2
Women Survey, December 2021	53.6
Socio-economic situation, attitudes to GBV and security, August 2022	49.0

Women focused study

Fully focus on women

ADVANCE EDITION
**REGRESSING GENDER
EQUALITY IN MYANMAR:**
Women living under the pandemic
and military rule

• Interviewed 2,200 women
aged 18 and above

- Domestic violence
- Women access to pregnancy and childbirth services
- Domestic work and unpaid care
- Household decision making
- Age matters: 18-30, 31-39 years old

4 out of 10 do not feel safe in their own village or ward during the day.

6 out of 10 say that getting access to health services in the last month had been more difficult than usual.

2 out of 10 currently live in a household where there are no earners.

6 out of 10 women have experienced a fall in their own personal income since the military takeover.

Gender-sensitive data in SDG-MM

Criticality criteria for goal and target

- Crisis impact: goal/targets heavily affected by crisis
- Leave No-One Behind: goal/targets where high levels of inequality persist in Myanmar
- Humanitarian/Development Nexus: goals/targets covering essential / life-saving needs
- Women & Children: goals/targets essential to the well-being of women, children and youth
- Human rights: goals/target protecting basic human rights currently under attack
- Environmental resilience: goals/targets target essential for preserving critical ecosystem-services currently under threat
- Downstream: goals/targets focusing on tangible outcomes for population, businesses, environment
- Conflict mitigation: goals/target closely associated to main conflict drivers in Myanmar.

Gender-disaggregated:

- Proportion of population below international poverty line (by sex)
- Number of people displaced internally by conflict (by sex)
- Etc.

Women focused:

- Number of cases of rape reported to the police per 100,000 pop
- Maternal mortality ratio per 100,000 live births
- Etc.

Gender-sensitive data in SDG-MM

Goal	Total indicators	Data available	Data since 2020	Data since 2021	Gender-sensitive
1: Poverty	14	12	9	9	3
2: Hunger	15	11	10	9	3
3: Health	21	18	13	11	3+6
4: Education	13	10	8	2	2
5: Gender	13	10	9	7	3+7
6: Water and sanitation	3	3	3	1	0
8: Economic growth	21	21	19	16	8
11: Sustainable cities	4	4	1	1	0
16: Peace/Justice	15	13	12	9	2
TOTAL	119	100	84	65	24 + 13

24% gender disaggregated data
13% women focused data
