

# **Concept of Education and Learning**

**U Tin Nyo  
EC member,  
Myanmar Academy of Arts and Science**

## Concept of Education

### ➤ The older concept

- “Education = schooling = teaching”  
is no longer valid;

### ➤ The new concept

- Schooling is not the only form of education;
- Teaching is only one of many instruments of education;
- One learns from every situation in life;
- The educational system has to be continually modernized and overhauled to meet changing needs and challenges;

## From the perspective of a learner

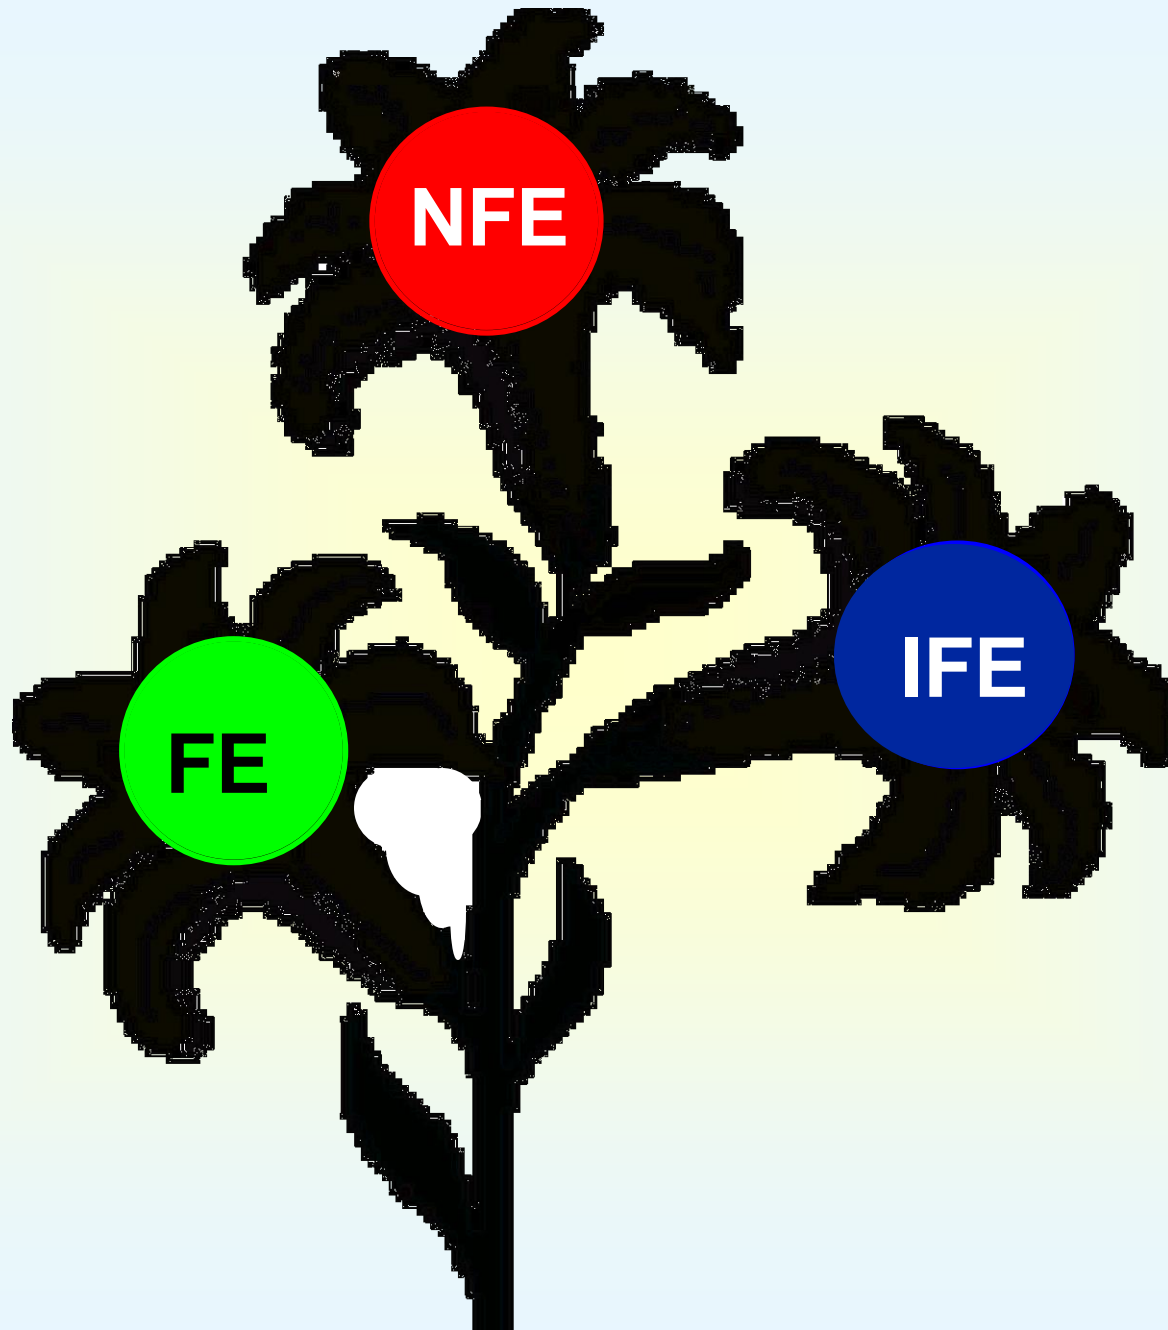

- The entire **ENVIRONMENT** is source of learning.
- Learning takes place through out the life.
- **EDUCATION** goes on from **WOMB** to **TOMB**.

It is a **Life Long Process**

**Life Long Learning LLL**

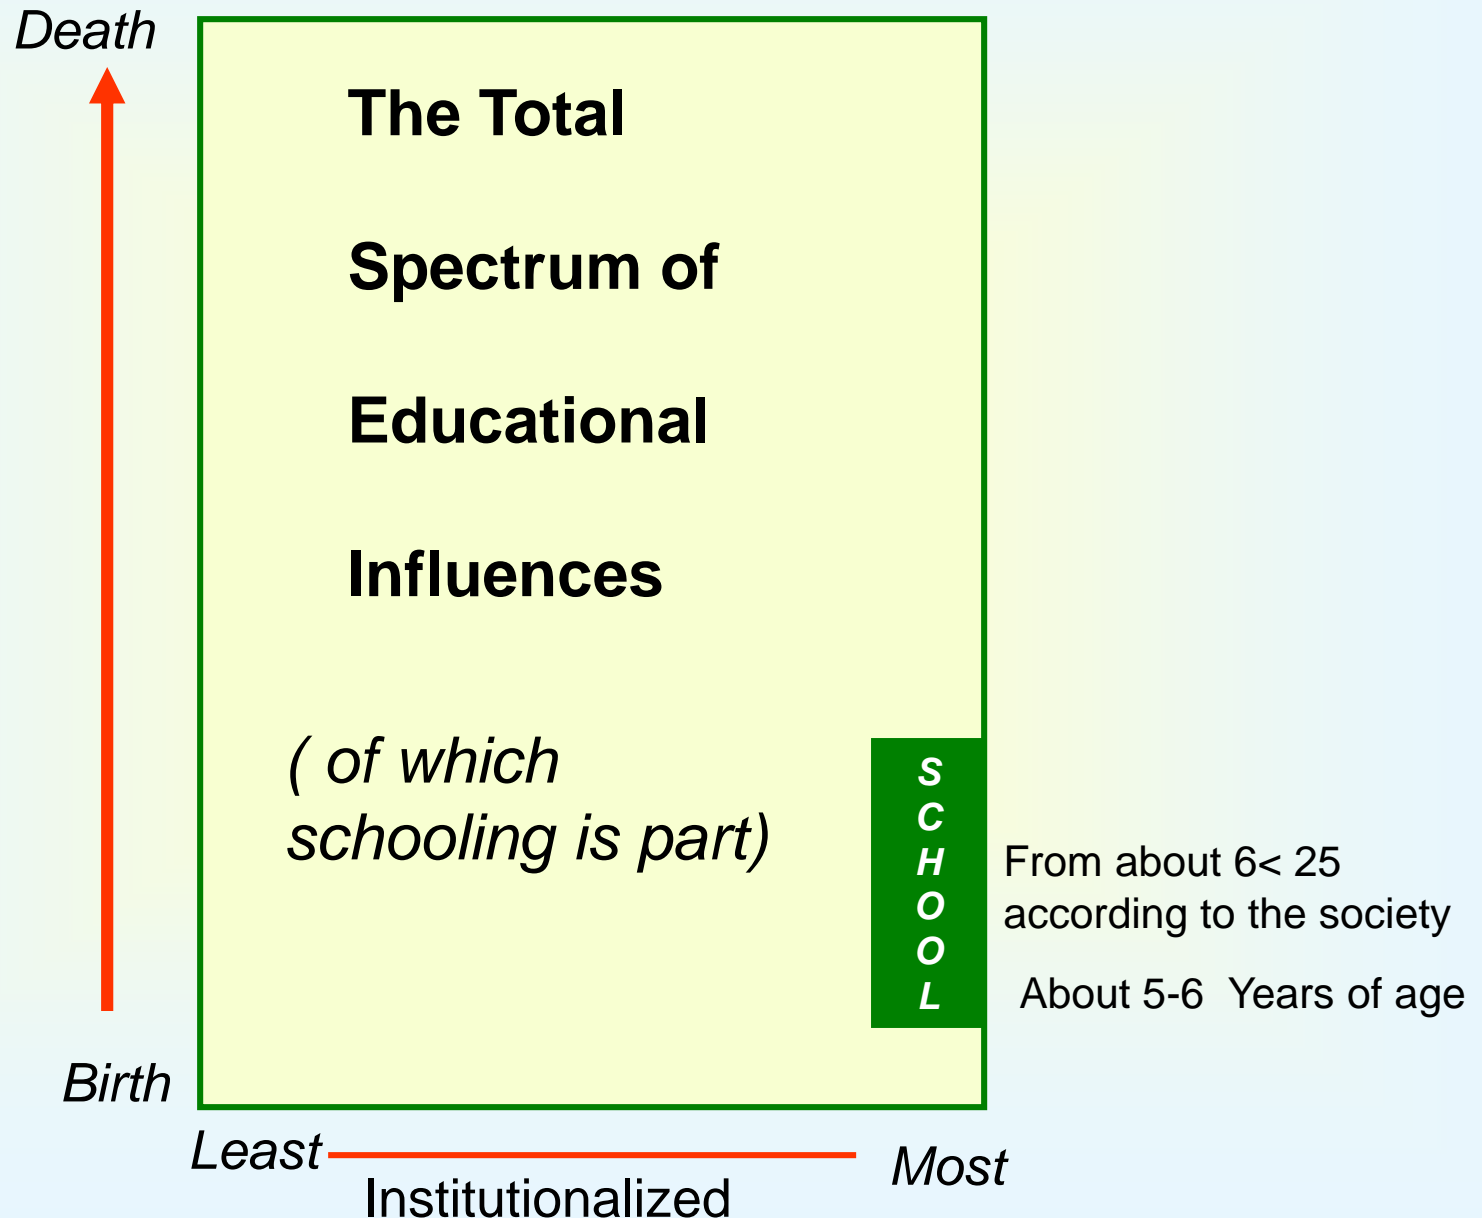

## ✚ From the perspective of **Life Long Education**:

- Formal Institutes of learning;  
*Formal Education, FE*
- Organized out- of -school programmes;  
*Non Formal Education, NFE*
- Every day life experiences;  
*Informal Education, IFE*

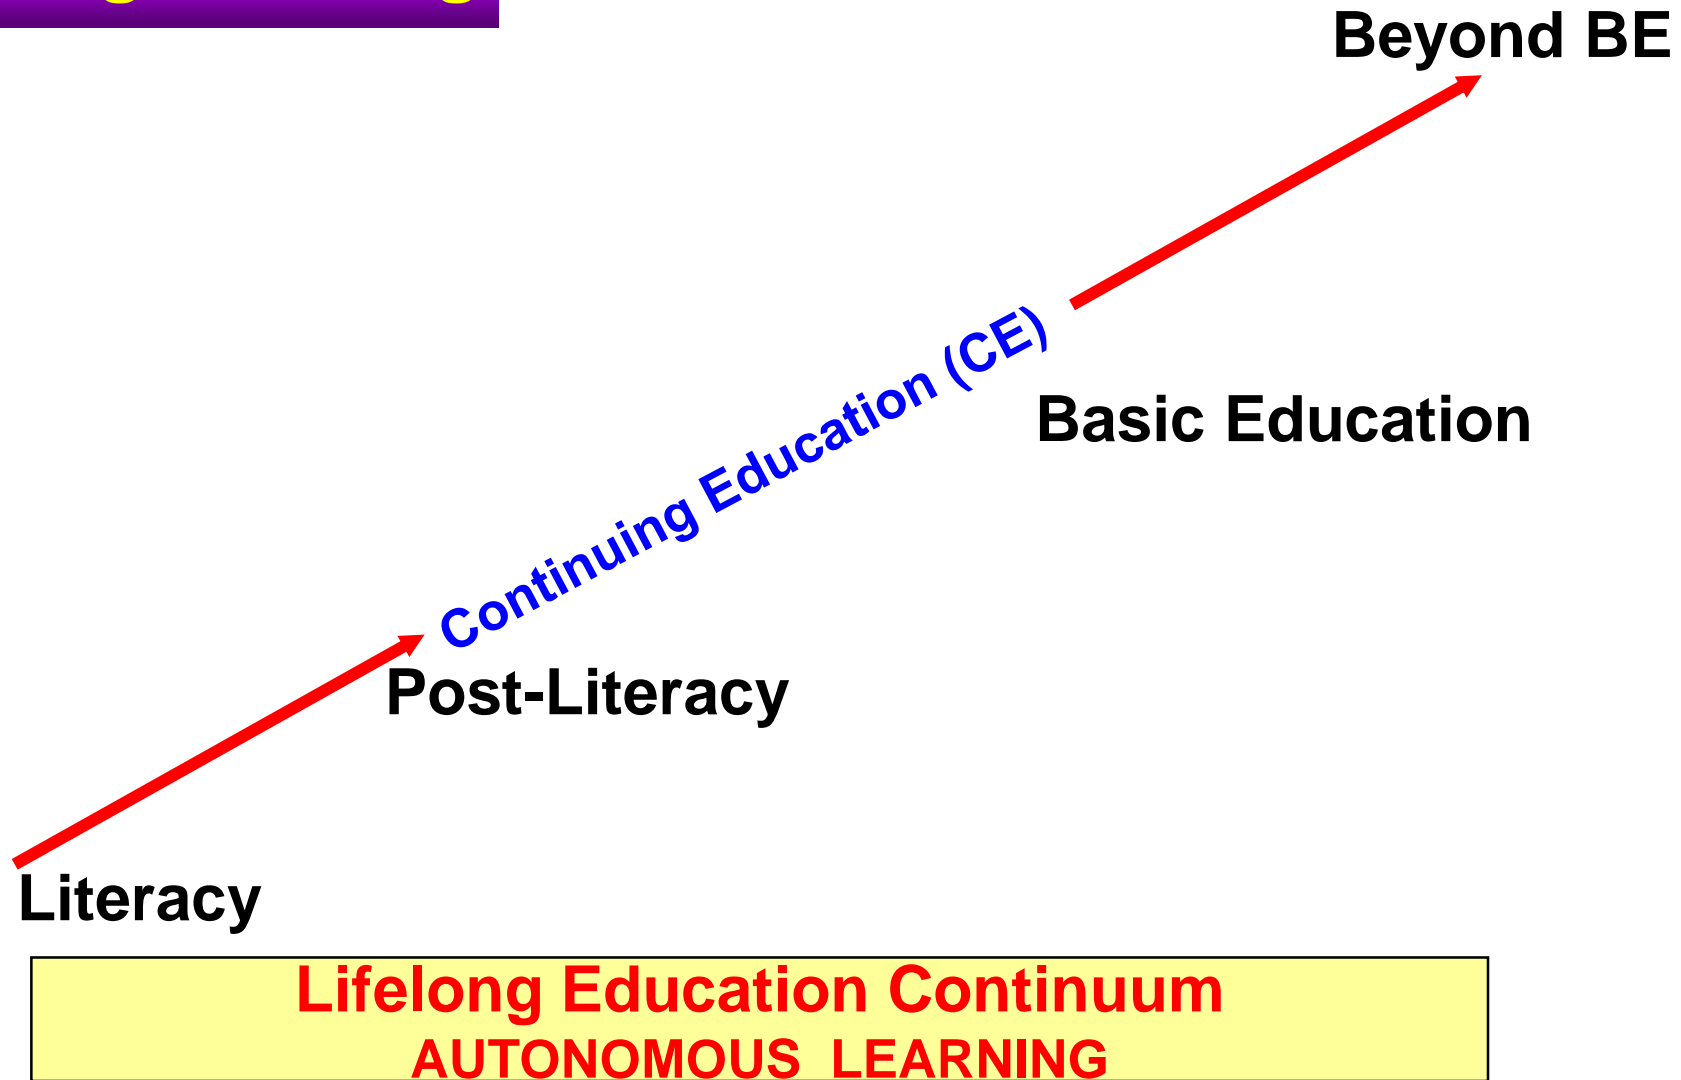

*Are all contexts and through which **LEARNING** may take place !*

# The relationship of schooling to the total spectrum of educational influences

# Life Long Learning

The principle of **Lifelong Education** is to provide each individual with the means for educating himself throughout his entire lifetime
