Instructions:			
1) The community price survey should be undertaken in the market where <u>most households</u> in the ward/village buy the <u>majority</u> of their <u>food products</u> (as determined by the <u>Key Informants Survey</u> for the same ward/village). Usually this will be at the local market, and in some cases at the regional market.			
2) The questionnaire should be completed by a (fack) enumerator coming from the same local area, in order to minimise potential biases in respondents' answers.			
3) Prices should be surveyed in 3 different locations for each item.			
4) Please identify all shops/stands/vendors/ service provider visited towards completion of the Price Questionnaire in each ward/village.
