

WASH Indicators	Definition	Corresponding 4W sub indicator	Parameter/Assumptions
Number of women, men, boys and girls benefitting from safe/improved drinking water, meeting demand for domestic purposes, at minimum/agreed standards	Safe water: fecal coliform count of 0 organisms per 100 ml of water Improved source of water: type of water source that, by nature of its construction or through active intervention, is likely to be protected from outside contamination, in particular from contamination with fecal matter. Domestic purposes: bathing, drinking and cooking	# of functional improved water sources (Handpump) in the site operating at the end of the reporting period # of functional improved water sources (tapstand/hand dug well) in the site operating at the end of the reporting period # of people who received safe drinking water (through household water filters or centralized water treatment system) # of litres of water supplied by water boating/trucking during water scarcity to total population in the site period	Improved water sources: tapstand/Hand dug well 400 PPL, Hand Pump 500 PPL, Tank, Water Boating/Trucking, Distribution System (max: 15L/P/D, min 5-7.5L/P/D : 8 hr tapstand open,
and girls benefitting from a functional excreta disposal system, reducing safety/public health/environmental	Functioning excreta disposal system: system which leads to safe disposal of excreta, so that it does not contaminate the environment, water, food or hands, is essential for ensuring a healthy environment and for protecting personal health.	# of functional adult latrines that meet design requirements in the site operating during reporting period # of functional children latrines that meet design requirements in the site operating during reporting period # of persons with disabilities with adapted sanitation option	Camp: 20people : 1latrine
Number of targeted women, men, boys and girls benefitting from timely and/or adequate and/or tailored personal hygiene items and receiving appropriate/ community tailored messages that enable health seeking behavior		# of people (men) receiving consultation, hygiene promotion messages and sessions during reporting period # of people (women) receiving consultation, hygiene promotion messages and sessions during reporting period # of people (boys) receiving consultation, hygiene promotion messages and sessions during reporting period # of people (girls) receiving consultation, hygiene promotion messages and sessions during reporting period # of affected households receiving a sufficient quantity of soap during the reporting period # of affected women and girls receiving a sufficient quantity of sanitary pads during the reporting period	# of people receiving consultation, hygiene promotion messages and sessions during reporting period (OR) # of people receiving basic Hygiene items

RAKHINE STATE - IDP sites (2021 - Qtr 3 - HEALTH & WASH Integrated Analysis, July - September 2021)

enable health seeking behavior

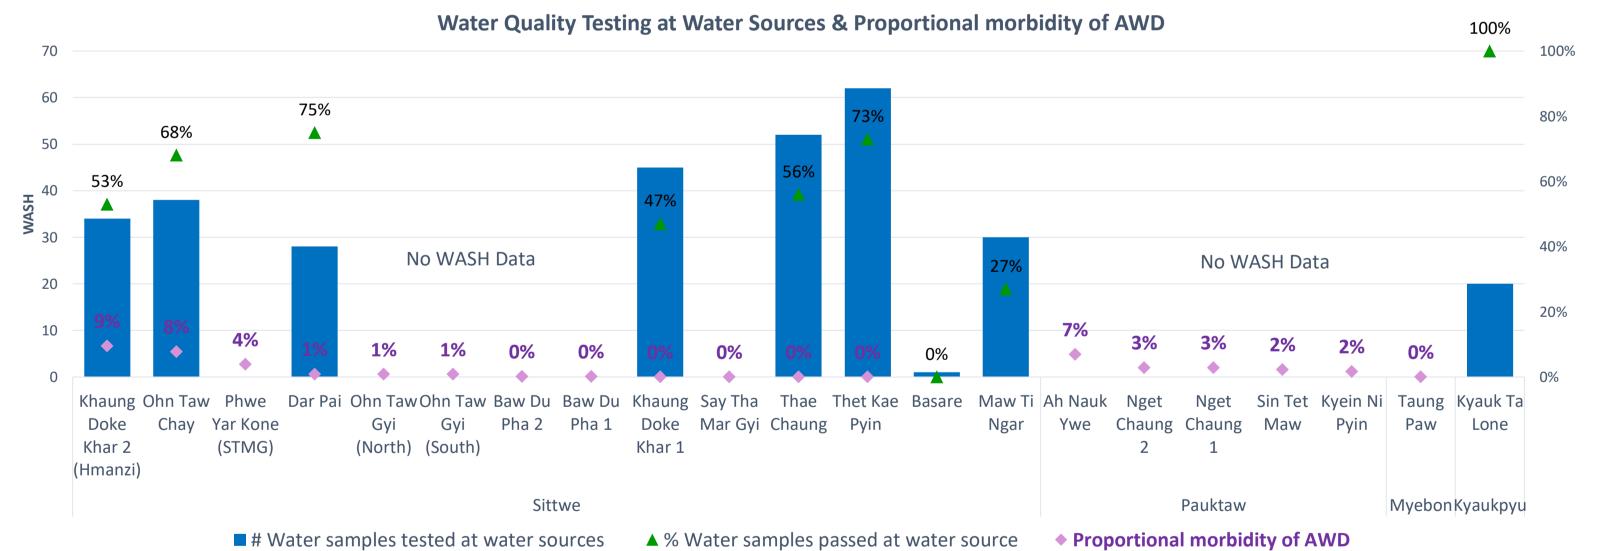

Proportional morbidity of AWD

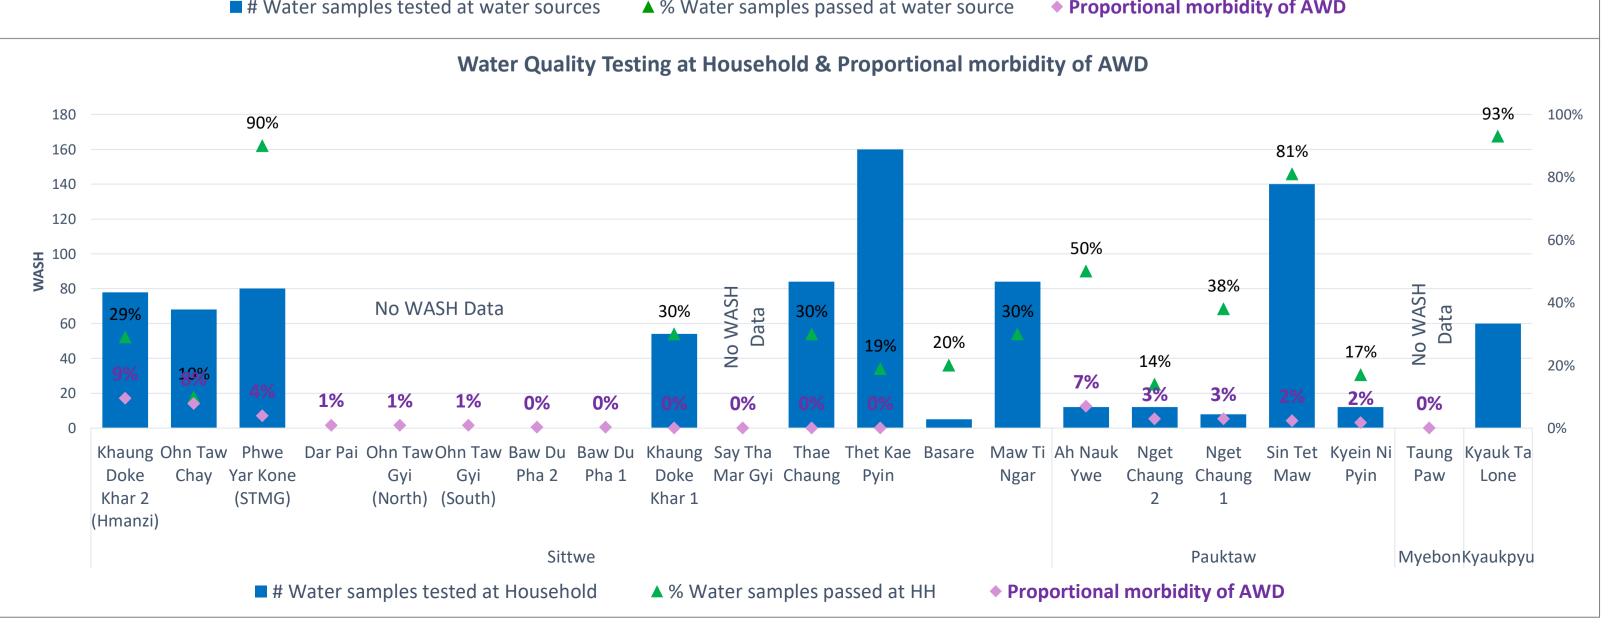

reached by Water/Sanitation and

"Denominator": Total population in

Hygiene

IDPs site
