# Bogale - Myanmar Flood - 01/08/2015 Delineation Map

## Cartographic Information

1:110000      Full color ISO A1, low resolution (100 dpi)

0 2.5 5 10 km

Grid: WGS 1984 UTM Zone 46N map coordinate system  
Tick marks: WGS 84 geographical coordinate system

**Legend**

**Crisis Information**  
Flooded Area (09/08/2015 11:13 UTC)

**General Information**  
Area of Interest

**Administrative boundaries**  
Province

**Settlements**  
Populated Place  
Built-Up Area

**Hydrology**  
Reservoir  
River

**Transportation**  
Secondary Road  
Local Road

**Map Information**

Unusual heavy monsoon rains have been affecting Myanmar since 16 July causing river overflows and floods. In the past few days, torrential rains damaged farmland, roads, rail tracks, bridges and houses.

The core users of the map is Emergency Response Coordination Centre (ERCC).

| Relevant date and time records (UTC) |                  |                    |                  |

**Data Sources**

COSMO-SkyMed © ASI (2015), distributed by e-GEOS S.p.A. (acquired on 09/08/2015 11:13, GSD 30 m) provided under COPERNICUS by the European Union and ESA.

Landsat-8 © U.S. Geological Survey (acquired on 21/03/2015 and 05/03/2015, GSD 15 m, respectively approx. 0.07% and 0.88% cloud coverage)

Base vector layers based on OpenStreetMap © OpenStreetMap contributors, Wikimapia.org, GeoNames (approx. 1:10000, extracted on 01/02/2001), refined by SERTIT. Source information is included in vector data.

Elevation data: SRTM (90 m posting). Height in meters above mean sea level.

Population data: Landscan 2010 © UT BATTILLE, LLC.

All Data sources are complete and with no gaps.

Inset maps based on: Administrative boundaries (JRC 2013), Hydrology, Transportation (Natural Earth, 2012), Settlements (Geonames, 2013).

**Dissemination/Publication**

Delivery formats are GeoTIFF, GeoPDF, GeoJPEG and vectors (shapefile and KML formats).

Map products available in the Copernicus EMS Portal at the following URL:  
<http://emergency.copernicus.eu/mapping/list-of-components/EMSR130>

All products are © of the European Union.

**Disclaimer**

The products elaborated in the framework of current mapping in rush mode activation are realized to the best of our ability, within a very short time frame during a crisis, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with Copernicus EMS Rapid Mapping Product Portfolio specifications.

**Map Production**

The present map shows the flood delineation in the area of Bogale (MYANMAR). The basic topographic features are derived from public datasets, refined by means of visual interpretation of pre-event image Landsat-8.

Thematic layers, assessing the delineation of the event have been derived from post-event image COSMO-SkyMed.

All satellite images have been radiometrically enhanced, orthorectified with RPC approach (using SRTM elevation data).

The estimated geometric accuracy of this product is 12 m CE90 or better, from native positional accuracy of the background satellite image.

The estimated thematic accuracy of this product is 85 % or better, based on previous experience in using high-resolution SAR for flood extent delineation. Please be aware that the thematic accuracy might be lower in urban and forested areas due to known limitations of the analysis technique.

Only the area enclosed by the Area of Interest has been analyzed.

**Contact**

Map produced by SERTIT under contract 259736 with the European Union.

Name of the release inspector (quality control): e-GEOS (ODO).
