

## Yangon West - Myanmar Flood - 01/08/2015 Delineation Map - Monit01

**Cartographic Information**  
 1:110000 Full color ISO A1, low resolution (100 dpi)

Grid: WGS 1984 UTM Zone 46N map coordinate system  
 Tick marks: WGS 84 geographical coordinate system

- Legend**
- |                                     |                       |
|-------------------------------------|-----------------------|
| <b>Crisis Information</b>           | <b>Hydrology</b>      |
| Flooded Area (15-08-2015 23:24 UTC) | Lake                  |
| <b>General Information</b>          | Reservoir             |
| Area of Interest                    | River                 |
| Sensor Footprint                    | <b>Transportation</b> |
| <b>Administrative boundaries</b>    | Aerodrome             |
| Region                              | Bridge                |
| Province                            | Railway               |
| <b>Settlements</b>                  | Primary Road          |
| Populated Place                     | Secondary Road        |
| Built-Up Area                       | Local Road            |

**Consequences within the AOI on 15/08/2015**

		Affected	Total in AOI
Flooded area	ha	89403	
Estimated population	Inhabitants	59141	3749921
Settlements	Built-up area	633	40136
Transportation	Aerodrome	No. 0	2
	Bridge	No. 0	6
	Railway	km 0	74
	Primary road	km 7.8	198
	Secondary road	km 30.5	241
	Local road	km 24	209

**Map Information**  
 Unusual heavy monsoon rains have been affecting Myanmar since 16 July causing river overflows and floods. In the past few days, torrential rains damaged farmland, roads, rail tracks, bridges and houses. Reservoir are seasonal inundated areas and water bodies probably due to agricultural practices (paddy fields).  
 The core users of the map is Emergency Response Coordination Centre (ERCC).

*Relevant date and time records (UTC)*

Event	Date	Last crisis status	Date
Event	01/08/2015 00:00	Last crisis status	15/08/2015 23:24
Activation	07/08/2015 10:00	Map production	17/08/2015

**Data Sources**  
 Sentinel-1 (acquired on 15/08/2015 23:24 UTC, GSD 20 m) provided by ESA.  
 Landsat-8 © U.S. Geological Survey (acquired on 26/02 and 21/03/2015, GSD 15 m, < 1 % cloud coverage).  
 Base vector layers based on OpenStreetMap © OpenStreetMap contributors, Wikimedia.org.  
 GeoNames (approx. 1:10000, extracted on 08/08/2015), refined by SIRS. Source information is included in vector data.  
 Elevation data: SRTM (90 m posting). Height in meters above mean sea level.  
 Population data: Landsat 2010 © UT BATELLE, LLC.  
 All data sources are complete and with no gaps.  
 Inset maps based on: Administrative boundaries (JRC 2013), Hydrology, Transportation (Natural Earth, 2012), Settlements (GeoNames, 2013).

**Dissemination/Publication**  
 Delivery formats are GeoTIFF, GeoPDF, GeoJPEG and vectors (shapfile and KML formats).  
 Map products available in the Copernicus EMS Portal at the following URL: <http://emergency.copernicus.eu/mapping/list-of-components/EMSR130>  
 All products are © of the European Union.

**Disclaimer**  
 The products elaborated in the framework of current mapping in rush mode activation are realized to the best of our ability, within a very short time frame during a crisis, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with Copernicus EMS Rapid Mapping Product Portfolio specifications.

**Map Production**  
 The present map shows the flood delineation in the area of Yangon West (MYANMAR). The basic topographic features are derived from public datasets, refined by means of visual interpretation of pre-event image Landsat-8.  
 The thematic layer, assessing the delineation of the event, has been derived from post-event image Sentinel-1.  
 All satellite images have been radiometrically enhanced, orthorectified with RPC approach (using SRTM elevation data).  
 The estimated geometric accuracy of this product is 40 m CE90 or better, from native positional accuracy of the background satellite image.  
 The estimated thematic accuracy of this product is 85 % or better, based on previous experience in using high-resolution SAR for flood extent delineation. Please be aware that the thematic accuracy might be lower in urban and forested areas due to known limitations of the analysis technique.  
 Only the area enclosed by the Area of Interest has been analyzed.

**Contact**  
 Map produced by SIRS under contract 259736 with the European Union.  
 Name of the release inspector (quality control): SERTIT (ODO).
