

Myanmar ranks first as the 'most at risk' country in Asia the Pacific according to the UN Risk Model. The country is vulnerable to a wide range of hazards, including floods, cyclones, earthquakes, landslides and tsunamis. The likelihood for medium to large-scale natural disasters to occur every couple of years is high, according to historical data.

Whilst these disasters have caused severe losses to the affected communities and delayed important development work, they have resulted in increased operation between the Government, the international community and local organizations.

MAY 2008

> **May 2008 (Cyclone Nargis):** Cyclone Nargis left some 140,000 people dead and missing in the Ayeyarwady Delta region. An estimated 2.4 million people lost their homes and livelihoods.

Two major earthquakes affected over 20,000 people.

Preparedness

OCHA is supporting the implementation of the **Minimum Preparedness Package** for emergency response in Myanmar as a tool aimed at strengthening emergency preparedness building upon existing efforts and capacities. OCHA has developed an action plan, which will guide the design and delivery of a support package for the coming months.
