This map illustrates the evolution of mangrove extent in Myebon Township in Rakhine State, Myanmar as derived from Landsat-5 multispectral imagery acquired between 13 January and 23 February for 1988 and 30 January and 24 February for 2015 at 30m of pixel resolution. This is a preliminary analysis and has not yet been validated in the field.

Data sources:
- Landcover Analysis: UNOSAT
- Administrative Boundaries, Settlements: OCHA
- Coordinate System: WGS 1984 UTM Zone 46N

Note: Data designations and boundaries contained on this map are not intended to be ex ante and do not imply acceptance by the REACH partners associated, donors mentioned on the map.
