(as of 30 June 2025)

86,470 people	~1,000 people	19,205 people
1.3 mil Litres	20 units	4,707 people
300 metric tonnes of relief items	156,836 people	23,424 households
33 National Societies	671 volunteers	30 townships

Achievements and Key Needs

Shelter and settlement

- MRCS has delivered emergency shelter assistance and essential household items such as tarpaulins, shelter toolkits, tents, and solar lamps across affected regions.

Key needs: Scaled-up transitional shelters, enhanced shelter design, and including designated safe spaces for women and girls as monsoon risks intensify. Distribution of household items will continue as needed.

Health and Water, Sanitation & Hygiene (WASH)

- Mobile clinics and ambulance services are providing ongoing health care to communities in camps and hard-to-reach areas. This includes MHPSS services and child-friendly spaces to support emotional recovery for children and families.
- MRCS has ensured access to clean water, latrines and hygiene materials for displaced communities.

Key needs: Expanded health outreach, access to essential medicines, and disease prevention measures for vulnerable communities, expand latrine construction and hygiene promotion.

Livelihood and Basic Needs

- Food assistance and basic relief items have helped stabilize daily consumption for affected households.
- Complementary cash was provided to meet immediate household needs in coordination with relief distributions.

Key needs: Rolling out multipurpose cash assistance to support displaced households and those without income.

Protection & Community Engagement

- Inclusive relief has supported vulnerable groups through dignity kits, safe spaces and tailored services.
- Community hotlines, feedback desks and field engagement have guided an adaptive, people-centered response.

Key needs: Expanded protection services and stronger referral pathways are needed to address growing risks in crowded sites. A centralized digital system is needed to analyze and respond to feedback more systematically across locations.
