The Myanmar Information Management Unit, or MIU, provides information management services to strengthen analysis and decision-making of the humanitarian and development community in Myanmar. It maintains a common data and information repository with data from various sources on all sectors, countrywide, at the lowest administrative level at which it is available. This information is then made publicly accessible to UN, NGO, donor and Government stakeholders in the form of maps, databases and other tools which support the coordination, planning and implementation of humanitarian, development and peace-focused activities. This product has been prepared for operational purposes only, to support humanitarian and development activities in Myanmar.
