Recent estimates of Kachin State population

Population Distribution estimate (2015) (yellow → green → blue indicating increasing population density) is drawn from WorldPop data which correlates satellite information on landcover and population density from various sources including the 2014 census across grid cells 100m sq. These projections may be less accurate in areas with lower Census coverage (Bhamo District, Kachin State in particular)

Village Mapping based on data collected by MIMU through the Place Code initiative through which 51% of the total 3,081 villages listed in Kachin State can now be mapped.

Legend
Population Distribution
(Persons per square 100m)
- High : 506
- Low : 1
Settlement
- Village
- Capital City
Transportation
- Airport
- Border Crossing Point
- Road
- Railway
Boundary
- Township
- State/Region
- International
Hydrology
- River/Stream
- Water Body
