
Recent estimates of Shan State population
Population Distribution estimate (2015) (yellow → green → blue indicating increasing population density) is drawn from Worldpop data which correlates satellite information on landcover and population density from various sources including the 2014 census across grid cells 100m sq.

These projections may be less accurate in areas with lower Census coverage (Bhamo District, Kachin State in particular)

Village Mapping based on data collected by MIMU through the Place Code initiative through which 49% of the total 15,892 villages listed in Shan State can now be mapped.
