

MIMU Villages Improvement Mapping

Why we do this?

- MIMU has developed continuous village point countrywide (not official but most useful data)
- Released version 9.5 in Feb 2024
- Aprox 72000 villages, 66000 are active
<https://themimu.info/place-codes>
- Unique code (Pcode) is created for each village
- MIMU cannot cover nationwide, need local knowledge for many areas
- CDE created ArcGIS web app to contribute village locations improvement

Current Status

- CDE developed an online application (ArcGIS WebApp)
- <https://unibern.maps.arcgis.com/apps/webappviewer/index.html?id=b5eaf262f84544fc81abcc6ebcbee490>
- Working with Proximity Design and MIMU
- PD has 13 branch offices and field knowledge
- Organized two trainings already
- If other organizations are interested, we can train

ArcGIS Web App

Village data editor

Improving MIMU village data with reliable field data and local knowledge

Layer List Legend

Layers

- ☒ PD ရုံးခွဲများ - PD branch offices
- ☒ ကျေးရွာများ (ပြုပြင်ရမည့် layer)
- ☐ Villages (without edits)
- ☒ Towns
- ☒ Proximity Design office buffer
- ☒ ကျေးရွာအုပ်စု နယ်နိမိတ် - Village Tract
- ☒ လမ်းမကြီး - Main highways

Edit village data

ကျေးရွာအသစ်များဖန်တီးရန် အောက်ပါ ၂ မျိုးကိုအသုံးပြုပါ။
ရှိနေပြီးသားကျေးရွာများကို ပြင်ဆင်လိုလျှင် အောက်ပါလေးထောင့်ကွက်ထဲမှ လွတ်နေသော နေရာတွင် တစ်ချက်ထောက်ပြီး ကျေးရွာကိုရွေးချယ်ပါ။

ကျေးရွာများ (ပြုပြင်ရမည့် layer)

- P1 pcode ရှိပြီး သားရွာကို...
- P2 ရွာအသစ်ထည့် (pcode မရှိ...)

Objectives

- **Want to improve village locations and data where PD have local knowledges**
 - **Priority One - Provide locations to Pcoded villages (already in the list)**
 - **Priority Two - Provide complete new villages (create new Pcode, MIMU standard)**
 - Improve the locations of existing villages (least priority)
