On 3 June 2026, Severe Tropical Storm Jangmi continued to affect large parts of Japan, bringing torrential rainfall, strong winds and heightened risks of flooding and landslides across several regions. According to the Japan Meteorological Agency (JMA), the storm made landfall near Wakayama Prefecture at approximately 04:30 local time and travelled toward the Tokai and Kanto regions. Heavy rain bands associated with the storm have affected parts of Kanagawa and Shizuoka prefectures, including the Izu region, prompting warnings for landslides, flash floods and river flooding. Authorities issued Level 4 evacuation warnings for flooding along several rivers in Tokyo and landslides in parts of Chiba, Kanagawa, Shizuoka and Mie prefectures, while the Level 5 emergency flood warning for the Kozagawa River in Wakayama Prefecture has been downgraded to Level 2 as conditions improve. JMA warns that Heavy rainfall is expected through 4 June, with 24-hour accumulations of up to 300 millimetres forecast in Kanto-Koshin and Tokai regions. ¹

MYANMAR

Civilians continue to pay the highest price in the ongoing conflict as military operations, airstrikes and ground fighting drive displacement and humanitarian needs across multiple regions. In Tanintharyi Region, intensified operations since mid-May reportedly displaced more than 5,000 people from several villages, with many sheltering in forested areas and facing severe shortages of food and basic supplies. In western Bago Region, around 12,000 people remain displaced since April amid continued airstrikes and insecurity, with humanitarian access constrained and needs for food, shelter and healthcare remaining high. Civilians in conflict-affected areas remain exposed to serious protection risks amid continued reports of civilian harm and concerns regarding adherence to international humanitarian and human rights law. ²
