

Rapid Needs Analysis (RNA) Training

Simulation Exercise

Cyclone in Mon and Kayin States

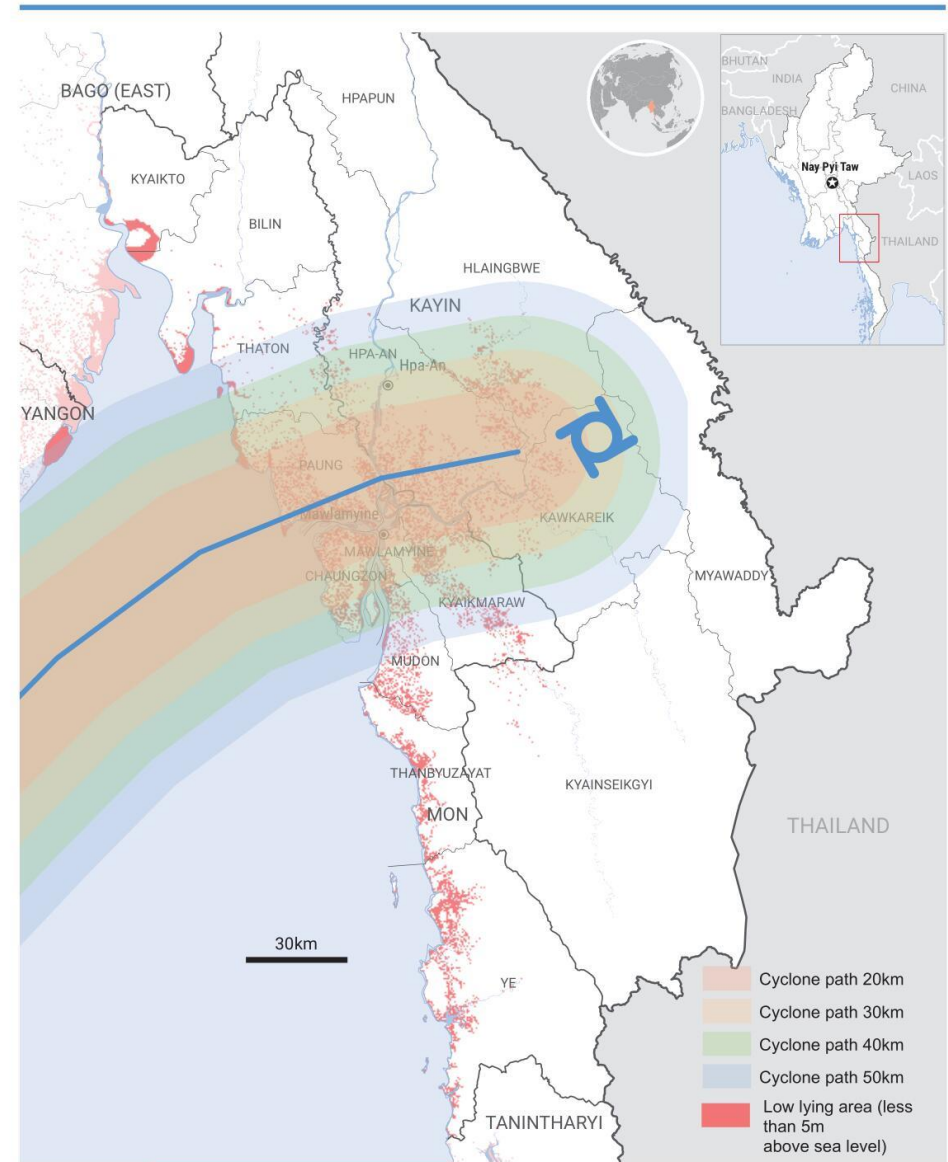

On Monday, 15 November, at 7:32am a category 4 level tropical cyclone makes landfall in the south of Paung Township, Mon State (see map), travelling inward into Kayin State, severely impacting the state capitals Mawlamyine and Hpa-An as well as several other townships. There is widespread damage to people's houses and critical infrastructure including public buildings, roads, bridges, telecommunications, and electricity. Heavy rain continues inland following the cyclone's dissipation into a tropical storm, causing flash flooding and landslides. According to the concerned authorities have issued a state of emergency, focusing on restoring damaged government buildings and clearing debris from key roads connecting Yangon with Mon, Tanintharyi and Kayin.

MYANMAR

Cyclone Scenario in Mon and Kayin States

DRAFT

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
Creation date: 20 Sep 2021 Sources: UNISYS, USGS, WorldPop. Feedback: ocha@myanmar.un.org www.unocha.org www.reliefweb.int

Additional Information

- There are unconfirmed reports of dead and injured from the most affected area. Public infrastructures were damaged due to the heavy wind and rain. The main road between Yangon with Mon, Tanintharyi and Kayin is blocked at places due to the damaged road and bridges.
- Mawlamyine, Paung, Chaungzon and Hpa-An are the most affected townships, whereas other townships on the storm path are also affected. No details were available yet from the authorities and humanitarian actors.
- Media reports that at least 186 persons were injured and 11 dead in the affected areas, coastal village tracts which are close to the storm path. Township authority instructs officials from Chaungzon Township to give required support to the affected community.

Standby message

You have been requested to support the assessment in Mawlamyine township, the most affected by the cyclone.

Aspects to be taken into account when organizing the assessment

“

- How do you organize your team and which are the main actions (up to 5) led by the Team Leader?
- Think in advance who should be suggested to be invited for the Focus Group/Key Informants discussion. Ensure women participation and try to organize a focus group discussion with women (to be facilitated with only female team members)
- Ensure debriefing with team members and identify which are the urgent humanitarian needs in the location assessed.

”

After the exercise, Feedback on:

1. Was RNA form user-friendly? Which questions/areas were not sufficiently clear? What would suggest being changed/clarified?
2. Electronic form: which challenges were encountered?
3. What are your group overall findings on the exercise?

Instruction for assessment

You have 2 hours to be accomplished the followings;

- Preparation before you go to the affected areas for the assessment
- Conducting Assessment (One group has to fill one RNA Form and Kobo Application)
- You have to report back to the Assessment Coordinator on the main priorities and key findings from you assessed area/s
- Feedback on exercise based on the three questions to be presented to all (for the Exercise Debriefing)
